PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building production web and mobile applications with React, Next.js, Angular, TypeScript and Node.js for employers and clients in Egypt and Saudi Arabia. Delivered 15+ projects across SaaS, e-commerce, healthcare, real estate and inventory management, including bilingual Arabic/English RTL interfaces, Paymob payment integration and LLM-powered features. Focused on performance (Core Web Vitals, SSR), reusable component systems, automated testing and clean architecture, with a track record of shipping remotely and on-site in Agile, cross-functional teams.

SKILLS

Frontend: React, Next.js 14 (App Router, SSR), Angular, TypeScript, JavaScript (ES6+), Redux Toolkit, RxJS, NgRx, React Context, Tailwind CSS, HTML5, CSS3/SCSS, Bootstrap, Material UI, Framer Motion, PWA, responsive and RTL (Arabic/English) UI, i18n

Backend & Data: Node.js, Express.js, REST APIs, Firebase (Auth, Firestore, push notifications), Supabase, PostgreSQL, Socket.io, JWT authentication, RBAC; project experience with .NET 10, EF Core, MediatR, Hangfire, Redis, MinIO

Mobile: Flutter (Riverpod, go_router, Dio, Drift, freezed), React Native, Expo, native Android services (Kotlin/Java)

AI & Automation: OpenRouter and Claude LLM APIs, prompt engineering, n8n workflows, WhatsApp Cloud API, Gmail API, Notion API, Chrome Extension (MV3)

Performance & Quality: Core Web Vitals optimisation, Lighthouse, lazy loading, code-splitting, bundle optimisation, SSR (Next.js / Angular SSR), WCAG accessibility, unit and integration testing, code reviews

Tools & Practices: Git/GitHub, Vite, Webpack, Vercel, Netlify, Figma, Postman, Agile/Scrum, Trello, CI/CD

WORK EXPERIENCE

Full-Stack Developer | Tharwah — Remote, Saudi Arabia — Sep 2026 – Present

- Develop full-stack features for Tharwah products serving the Saudi market, working across the React/Next.js frontend and the backend API with the remote engineering team.
- Deliver features through an Agile workflow with pull requests and code reviews.

Full-Stack Developer | Kowa — On-site, Egypt (products for the Saudi market) — Jun 2026 – Oct 2026

- Built and maintained frontend and backend features for products targeting Saudi customers, integrating REST APIs and authentication flows.

Frontend Engineer | Huma-volove — Full-time, Remote — Jan 2025 – Jan 2026

- Built responsive, scalable web applications with Next.js, React and TypeScript, contributing to the shared component library and design system evolution.
- Implemented Redux-based state management and reduced bundle size through code-splitting and lazy loading.
- Integrated RESTful APIs with robust authentication workflows and participated in code reviews in an async, cross-functional remote team.

Freelance Full-Stack / Frontend Developer | Self-employed — Remote — Jan 2024 – Present

- Delivered 10+ end-to-end web applications for SaaS, e-commerce, real estate and marketing clients, from design spec to Vercel deployment.
- Built reusable component systems and optimised Core Web Vitals and Lighthouse performance scores across client projects.
- Managed clients across time zones asynchronously with clear written communication and on-time delivery.

Full-Stack Developer Intern | CodVeda — Remote — Sep 2025 – Nov 2025

- Developed a Weather App, a Data Management System and a landing page with React, Node.js, Express, Material UI and Firebase.

Frontend Developer Intern — Team Lead | DevWave — Jun 2025 – Aug 2025

- Led the team building a full-stack Amazon clone (React, Redux, Firebase Auth); planned tasks in Trello, ran code reviews and enforced Git best practices.

PROJECTS

Stockly — AI inventory app for pharmacies and small shops in Egypt (Flutter app + .NET backend)

Links: Demo | App Code (GitHub) | Backend Code (GitHub)

Stack: Flutter, Riverpod, go_router, Dio, Drift, freezed; .NET 10, EF Core, MediatR, Identity + JWT, Hangfire, Polly; PostgreSQL 16, Redis 7, MinIO, OpenRouter, Paymob, Blazor

- Built an offline-first Flutter app that reads a supplier invoice from a photo with an LLM, extracts items, quantities and prices, validates the total (warning above 2% difference), fuzzy-matches lines to products in Arabic and English with confidence scores and updates stock in one confirmation.
- Implemented barcode quick-sale (camera or USB/Bluetooth scanner), multi-unit products (strip/box/carton), a stock-movement ledger, low-stock/negative-stock/expiry alerts, full Arabic/English RTL with light and dark themes, and Paymob subscriptions (card, Vodafone Cash, kiosk).
- Designed the .NET 10 backend and Blazor admin panel (shops, plans, scan limits, AI cost, payments); shipped 1,918 backend tests and 1,427 mobile tests with 97% mobile logic coverage and zero build warnings.

Smart Clinic — Healthcare SaaS platform for Egypt and MENA — Patient app, Doctor portal and Clinic ERP dashboard
Links: Demo | Code (GitHub)
Stack: Next.js 14, React, TypeScript, Firebase/Firestore, Tailwind CSS, OpenRouter LLM API, Paymob, PWA

- Built three portals with 70+ features, hierarchical RBAC and a multi-tenant architecture on a shared Firebase backend.
- Engineered a bilingual RTL/LTR UI system and reusable component library, pixel-accurate across all breakpoints.
- Integrated an ICD-10 compliant e-prescription module, AI-driven patient follow-ups (OpenRouter LLM), Paymob payments, real-time Firestore chat and an offline-capable PWA with push notifications. Status: in progress (~40%).

ResumeAI — AI-powered resume builder SaaS
Links: Demo | Code (GitHub)
Stack: Angular, TypeScript, Firebase, Tailwind CSS, OpenRouter LLM API, Angular SSR

- Delivered 35+ customisable CV templates with live preview, drag-and-drop section reordering and PDF (html2canvas + jsPDF) and Word (docx.js) export.
- Built an AI ATS Analyzer that scores resumes against job descriptions and recommends keywords, plus Voice Interview and AI Mock Interview modules.
- Improved SEO and Lighthouse scores with Angular SSR, lazy-loaded routes and code-splitting; bilingual Arabic/English RTL/LTR.

Èlevè Store — Premium e-commerce platform with admin CMS
Links: Demo | Code (GitHub)
Stack: Next.js 14 (App Router), React 18, Redux Toolkit, TypeScript, Tailwind CSS, Firebase, Paymob

- Built a high-end storefront with an animated hero carousel, advanced category/price/brand filtering and Redux Toolkit persistence for cart, wishlist and session.
- Integrated Paymob checkout for the Egyptian market with SSR, image optimisation and route groups for performance.
- Developed a fully responsive admin dashboard with CMS, full CRUD for products, categories and orders, and seed-data tooling that shortened QA cycles.

Aqar Masr — Real estate listing platform for the Egyptian market
Links: Demo
Stack: Next.js, Firebase, Tailwind CSS

- Built property browsing with advanced search and filters (price, location, type, area) and a buyer–seller inquiry system.
- Delivered a full Arabic RTL, responsive, SEO-focused Next.js build for the Egyptian property market.

Hulul Tech (حلول تك) — Bilingual company website for a Riyadh-based digital agency
Links: Demo
Stack: Next.js, React, Tailwind CSS, i18n (AR/EN), RTL

- Built an Arabic-first RTL site with an English version across Services, Work, Process and About pages for the Saudi market.
- Implemented a free-consultation funnel, WhatsApp contact, project-request and email contact forms, and a cookie-consent banner with granular preferences.

AI & Automation — n8n, OpenRouter, WhatsApp Cloud API, Gmail/Notion APIs, Chrome Extension MV3

- Automated job-application pipelines with Gmail, Notion and n8n, and email outreach targeting 300+ MENA companies.
- Built a student attendance notification system (Firebase, n8n, WhatsApp Cloud API), an AI proposal-generator Chrome extension for Upwork, Mostaql and LinkedIn, and a 13-command job-search automation tool on the OpenRouter API.

EDUCATION

Bachelor of Computer Science — Arab Open University, Egypt
